# Nozzles, Extensions, Ball Valves, Saddles & Auto Drain Valves

#### Arguably the best misting nozzles on the market!

OZmist misting Nozzles are specially designed and manufactured to exacting tolerances. They are two piece electroplated body with a stainless steel face. Unlike the other nozzles you can remove the top of our nozzle and clean both sides of the face with out any special tools. A nylon ball and spring eliminate drips on start up and shut down. Nozzles are available in 4 different flow rates.

A range of Nozzle Extentions and Nozzle Swivels ensure mist doesn't hit objects before evaporation has taken place. Both components simply screw into the nozzle hole. Nozzles then screw into the end of the fitting.

Stainless steel Ball Valves are available in 1/4", 3/8" and 1/2"

### NOZZLES

## **NOZZLE EXTENSIONS**

### **BALL VALVES**

#### **AUTO DRAIN VALVE**
